

Unbelievably versatile

SwiftPOS is a feature rich application that has every aspect of Point Of Sale operation taken care of. Created using the very latest software development environment, SwiftPOS brings leading edge functionality without sacrificing speed and ease of use. Together with comprehensive Back Office management software suites, SwiftPOS is the ideal solution for:

- Bars
- Clubs
- Restaurants
- Cafes
- Fast Food & QSRs
- Arenas & Function Centres

Hospitality

Point Of Sale Solution

The new generation in Point Of Sale systems

Introducing SwiftPOS: the latest generation Point Of Sale system that is not only extremely user-friendly, it is also unbelievably versatile.

Written by a team of industry professionals that each have over 15 years experience in Hospitality POS Software development and feedback from over 3,000 customers world-wide, the software is an extremely powerful, reliable, world class application.

Using the latest Microsoft .NET development environment has enabled SwiftPOS to be a user friendly, robust application that incorporates the latest in POS functionality.

SwiftPOS Touch will run on most standard touch screen terminals running Windows XP, allowing for an easy upgrade from your existing POS software.

**"Whatever information you
can't get from SwiftPOS
is not worth knowing"**

SwiftPOS: when speed counts

The design of the SwiftPOS Touch application has been based around extensive research and feedback from successful, high volume hospitality operations, and is suitable for use throughout the entire hospitality spectrum, from small cafes and fast food outlets through to large bars, restaurants and multi-venue businesses.

When creating SwiftPOS, deliberate attention has been paid to develop a Point Of Sale application that is fast, straight forward and easy to learn.

Superlative control

The SwiftPOS suite of back office software provides tight control over Inventory Management, Cash Management and Labour Costs. SwiftPOS will also help to detect problems such as shrinkage and wastage before they get out of hand. Inventory levels are adjusted after each sale, so you will always know exactly what your stock levels are, even when a stocktake is in progress, thanks to real time processing of sales transactions.

The wide range of back office reporting and analysis over unrestricted periods gives you superlative control in which to drive your business. Comprehensive reporting is available for franchise and multi-venue operations which also can be accessed via the Internet anywhere in the world at any time.

In fact, whatever information you can't get from SwiftPOS is not worth knowing.
