

It's Stocktake Time Again

Do you have enough PDE's to get through this years stocktake? With new PDE's at a low \$1,650 ex GST why not buy another one to save some of your valuable time during stocktake?

Also make sure that your existing PDE's are in good working order before it's too late.

New Internet Shopping Interface

Retail Systems has just developed an interface with Grocery Managers Customer Manager & External Sales Software Modules to make Internet Shopping so much easier.

Installed at Dewsons Wembley, the time taken to process Internet Shopping orders has decreased as the order is created in Customer Manager and appears as a deferred sale on the WINPost register. This means that the items don't need to be scanned at the register (weight items exempted), dramatically reducing the time to fulfill an order.

Additional features include new customers added to Customer Manager automatically and stock on hand is obeyed (if requested).

For more information, please contact Peter Martin on 9422 5600.

Metcash Takeover

There are many rumors flying around regarding the Metcash takeover from FAL. The first of which is that there is scanning equipment for sale ex Action.

If you decide to buy this equipment, you should contact Retail Systems because we can load our POS software on the register for \$500 per lane.

This software has been certified to work with this equipment and allows integrated EFTPOS, customer accounts, loyalty and communications to the Grocery Manager back office software. For more information contact Peter Martin on 9422 5600

Meet our Newest Staff Member....

Konrad Malinowski Service Technician

Konrad has been working in the retail automation industry for a number of years doing software and hardware support for Point of Sale, Back Office and RFID equipment in Malaysia, Singapore and India.

Already Konrad has proven to be an invaluable member of the Retail Systems team.

Staff On The Move..

Also joining the Hardware team is Ian. After 2 years with Gavin and Mike in Software Support, Ian decided it was time for a change and has joined Dave, Terry and Konrad.

Entry Level UPS Sale

Have you been plagued with power problems during the recent damaging storms?

Retail Systems can assist in protecting your POS and PC Equipment from power related damage with a **Powerware 600VA UPS** for only **\$120.00** plus GST, team this with the **Zapcatcher 44 Power Surge Protector** for **\$150.00** plus GST and this will reduce the amount of damage caused.

For more information phone Bradley on 9422 5600.

X-Treme Surf & Skate are the latest company to install Retail Systems Time Target Staff Rostering solution to meet their complex rostering and payroll needs.

With 3 retail outlets, warehouse and head office locations, X-Treme faced a dilemma in choosing a solution that fulfilled their complex requirements without exceeding their allocated budget.

Time Targets unique abilities enabled Retail Systems to install the program directly onto their existing registers at each store without the need for Time Clock Kiosks and networking changes.

Staff can now start and finish shifts, check their rosters and request time off directly from the register

Fore more information on how Retail Systems Time Target solution can help your business please call Bradley on 9422 5600.

Metcash Host Support

Please be aware that all Grocery Manager users will have automatic connection to the Metcash Host Support whenever it arrives.

Grocery Manager Software is one of the preferred suppliers for the Metcash warehouse and Worldsmart ReTech works very closely with them to provide the latest features to the market place. Please call Peter Martin on 9422 5600 if you have any further queries.
